

Simon Holm

ARTIFICIAL INTELLIGENCE, SDU

+45 29 82 31 51 simon@cogito.dk [LinkedIn](#) [GitHub](#)

SKILLS

PROGRAMMING LANGUAGES

Python Java Haskell SQL

TOOLS

PyTorch SciPy Git Typst Manim

AREAS

Machine Learning
Deep Learning
Computer vision & NLP
Optimisation
Algorithms & data structures

LANGUAGES

Danish - native
English - fluent

INTERESTS

Mathematics & problem solving
Science-fiction films
Fitness & training
Music
Gaming

EXPERIENCE

Web Scraper & Web Developer

2026 - present

Institute of Economic History, SDU

- Collected and structured data from public sources using web scraping.
- Built website to visualise results for an SDU research project.

Student Helper

2025 - present

Dept. of Mathematics and Computer Science (IMADA), SDU

- Teach workshops on machine learning and algorithmic problem solving to upper-secondary students.

Chairperson, IMADA Student Council

Mar 2025 - present

University of Southern Denmark

- Lead the board organising social and academic events and improving the study environment at IMADA.

EDUCATION

BSc Artificial Intelligence

2024 - 2027

University of Southern Denmark (IMADA), Odense

Upper-Secondary Diploma, Technical (HTX)

2020 - 2023

Mathematics, physics, innovation & product development

SELECTED COURSES

Advanced ML	Deep learning, generative models
Computer Vision	CNNs, image analysis
NLP	Language models, text classification
Optimisation	LP/ILP, simplex, gradient methods
Algorithmic Game Theory	Equilibria, mechanism design
Knowledge Representation	Formal logic, proofs, Haskell

PROJECTS

sdust - Typst package

typst.app/universe/package/sdust

Published and actively maintained template package.

Emotion Classifier & interpretability

github.com/simo899t/emotion_classifier

Emotion classification in text with analysis of model decisions.

Cat & Dog Neural Network Classifier

github.com/simo899t/cat_dog_classification

Convolutional neural network classifying images of cats and dogs.

Simplex Search & ILP

github.com/simo899t/optimization_assignment_2

Implementation of the simplex algorithm and integer programming.

Path & CNN Optimization

github.com/simo899t/optimization_assignment_1

Optimal path algorithms in 2D and CNN hyper parameter optimization.
