6 Books	4

1 Learning Goals

- Networks
 - Fundamental
 - Applications Layer
 - Transport Layer
 - Networks & Link Layer
- Cybersecurity
 - Fundamentals
 - User Authentication
 - Human Factors
 - Privacy & Data Protection
 - Offensive Security

2 Use of AI

The choice is ours, however Peter recommends us to not use it initially

3 Structure

Lecture are supposed to be each tuesday and thursday mostly.

Exercises are wednesday and friday

Week 41 (5-11/11) will have no normal lectures. A guest lecturer on AI and Security will provided a video

4 Exam

Every slide (which is not a guest lecturer) is relevant for the exam unless “**This will not be in the exam**” is present in the slide.

- Exam will include lecture and exercise content
- Written exam
- Length: 3h
- Date: 8th January (tentatively)
- Expect at least one question on each of the topics we covered
- Most questions will be written answers, no multiple choice
- No aids are allowed!

5 Innovation Project

You will have to pretend to be a start-up, create a business plan, and develop a product

Additional time for this in week 39-46 (21/9 - 15/11)

Introduction to this project will be in week 39 (21/9)

6 Books

No books necessary buuuut, the following are recommended.
